INTRODUCTION

Society For Human Rights & Environment Protection

(S H E P)

"**S H E P**" felt the importance of its existence in the society where we find the violation of human rights, lack of concentration for the betterment of the dusty busy and the polluted atmosphere, the needy humanity begging to have the proper treatment at the government hospitals. Extremely dangerous situation of the pollution various kind of cursing situations against the whole humanity and its rights.

The team of senior and young sincere, loyal, honest, energetic, dedicated and ambitious lawyers, prosecutor's, journalists, social workers and the reputable business community. All together sited on the table of sincere thought and decided to dedicate their lives for a single aim with all their devotions and that was "Get deliverance to all these cursing conditions against the living creatures in this world". It was couple of years back when the team of highly motivated individuals and especially existing president Mr. M. Saeed Rajput and his cabinet decided to work for the humanity and behind the concept of **SHEP NGO** these are the main brain. Very much enthusiastic for the dream in order to make this world a better, peaceful, lovely and an adoring world to be lived, today at least this dream has started coming true in the beautiful shape of "**SHEP**" (**Society For Human Rights & Environment Protection**).

The name shows itself we are working for the human & human rights **SHEP** is a registered NGO (**Non-Governmental Organization**) having its legal status with the **Social Welfare Department, Government of Sindh**. It's a Karachi based organization and carrying its existence not only in **Karachi** infect SHEP working in whole province of Sindh as well.

SHEP Objectives.....

Under the umbrella of our aims we are concerned with four basic needs of human lives for the development of humans is as below

- Health.
- Environment.
- Education.
- Violation of Human Rights.

Being the more concerned "NGO" for the human rights we are gathered to play a major role against the anti-human rights activities including health and education as well. To bring the changes and making the system more effective "SHEP" working day and night.

HEALTH.

The environment we are living is entirely unhealthy since there is no basic concept of the health has been engineered and if it's been ever designed that chapter has been closed in the files of governments departments. How sorrowful today's human is that the most important facility for the human being has been put into marsh. We are deprived to have the healthy atmosphere and one of the most precious gifts of the god a good "health". **SHEP** feels it that providing the most effective and the essential facility on health is not only officials' responsibilities more over Non-Governmental Organizations should feel the responsibility to bring the healthier changes in the community as well.

Unfortunately both sectors completely failed to maintain the responsibility reason being lake of concentration to the devotion, aim and the objects of the facts. The gravity of pain

of the humans regarding the consciousness of the a perfect health is intentionally is so high and today's human more concerned with the most essential matters but unfortunately again the lake of Concentration on the 3 most important matter is null and void result came in the shape of severe health problems as the graph of the unhealthy peoples increasing drastically that is highly which is not only disgusting infect dangerous sign as well As we felt the matter on serious basis, We have planned to

seriously work on this issue We are sure quit sympathetically S HEP going to draw the kind attention of the most concerned officials not only drawing their attentions moreover giving them the ideas and the thought to have the situation solved on priority and short period of time

The high lights of our future projects regarding health.

- **Making the dispencerries in the rural areas.**
- **Building hospitals.**
- **Mobile dispencerries.**
- **Ambulance services.**
- **Blood bank.**
- **Free medical aid camping**
- **Building Exercise Gyms**

ENVIRONMENT.

As mention above the environment we have is entirely not meets such that standards that most modern community and the humanity rest of the world's modern countries citizen they have. Healthy and polluted free environment creates the healthy minds" **SHEP**" knows the effectiveness of better and polluted free environment.

Most of the countries they are facing the environment problems. The day we put ourselves into the luxuries and start spending our lives to the very high standards the graph of the green environment has begin rising down. The most of the world's environment infected by the commercialism. We should not forget the great invention and high technology somewhere damage the atmosphere/environment like anything and made this world polluted in every sense.

SHEP is completely against those activities, which cause to make the neat environment dirty.

If one step in to the Karachi city the pollution level is so high as one cannot walk with in the city limits highly dangerous smoke/lead/gases coming out of the busses silencers all the chemicals is like a slow poison damaging citizens lives

Out of the city limits we have the major problem in the shape of storing the garbage infect no proper garbage dustbins has been installed & no proper or specified places available for the purpose. No discipline & right frame work in order to lift the garbage reason being the environment getting uglier, lots of humans been infected into various viral disease got to a serious ailments or passed away.

Infect there is a basic need of education in order to aware the peoples not to avoid the storatation of garbage at the right and proper places moreover the garbage should be properly packed in plastic bags. **SHEP** has had observed that every individual efforts results a major thing on national basis and its always a well come change in the society. SHEP is going to arrange the seminars, workshops and the awareness camps for the purpose stated above.

SHEP plans to install the garbage drums everywhere in the Karachi city where peoples drop the garbage and **SHEP** with the help of government officials would lift it punctually. In order to provide a green atmosphere we have decided to work with the sincerity and with our all dedications. We have a plane to grow more and more trees, first in the limits of towns and then union councils and then eventually in the jurisdictions of Whole City In order to provide a green atmospheric city. The cleaner the environment the healthier the generation.

Our Future Prospects Regarding Environment

- **Installation of dustbins**
- **Growing more & more tree**
- **Growing palm trees at beaches**
- **People's awareness programs and camps**

EDUCATION.

The set standards of our education not meet the global standards. The numbers of educated peoples is something we may count them since the day Pakistan appeared on the map of the world the education graph been coming down rather than raised up. Following causes is the reason.

- **Insufficient funds.**
- **Unprofessional appointments.**

- **Less concentration.**
- **Politics.**
- **No strategy**

Various countries of the world has the unlimited budget on education if we take the simple example of our neighboring countries like Sri Lanka they have the unlimited budget as well Very sorrowful we are into this matter as the budget sanction to this matter never ever been used.

The personal interest of the officials damage the future of this nation the personal interest has been demolish and history is the witness if the high standards of education would have been given to this nation this country would have been in the line of most modern countries.

This is the highly professional department where the necessity of professional and sincere peoples always been needed but the appointments by the politicians and the influential characters ruined the interest on this nation Such unprofessional teachers/policies are the reason for the literacy rate that we have now.

Off course when the professionalism would be taken a side definitely no design or the strategy would be in the pipeline for the betterment/increment in education.

SHEP is come up with the engineered strategy to support the demolishing building of education, as we want to introduce the high standards of education since the beginning of any child's education. If the base is strong and been equipped well the building is going to be strong. We are here with the various immediate plans on this issue as under

- **Educational institution meeting the world class level**
- **Information technology institutions.**
- **Educational Institution for the teachers.**

Violation of Human Rights.

When the Churchill was questioned regarding the betterment and the increment of the country he replied in a question to the questionnaire" the judiciary is working as per their honesty?, "Yes" Was the answer Mr Churchill said then its fine the every department of the country will achieve their targets. Its been always cursing matter here as the violation of human rights has been ruled under the shoes of the laws and sometimes with the shine of the stars and the starch of the uniforms. 90% of the prisoners has the question mark on their faces why they have been victimized and what is the offence they have been punished for?

Look at the systems of this country how the rights being insulted here. This is a police station where a Non-Matriculate head constable (Head Mohrer) is considered to be the mother of the police station. He is equipped with all his stupidity and has the authority

to register a first information report(FIR) and the language he use in that report is a creation of a Head constable somewhere in 1950s. Now being delivered heart by heart to the modern time to this constable, once the writing been written on the report he is not sure himself he will be able to read it out next time. Any way first information report has been registered under the shadow of the few bugs.

Now it's a most reputable highly respected place called a "Supreme Court of Law" The higher educated and supreme brains in the shape of "Justices" and "Legal advisors" are gathered and lots of educated peoples are sitting in the court of law and discussing on that report which has been registered by a Non-Matriculate mother of the police station. The higher authorities have insulted even the rights of a human.

This country and the concept of Islam or any other religion never been made with believes of violating the rights of human Following are the areas where SHEP has its concerns regarding the human violation.

- **Child labor**
- **Women violation**
- **Legal aid centers**

Final Thought of S H E P.

SHEP being the NGO has its thought to provide the all assistance in any matter concerning human beings. Conveying the feelings of the sympathetic characters to the concerning authorities we are always with our open hands who ever thinks the caravan of our passions/aims can be supported by them, has a open offer to take their steps with ours. SHEP will fight for the deserving emotions get the priority and the right direction for their rights. In order to awareness of the rights, legal assistance and taking the various human being issues.

SHEP'S APPROACH FOR THE EDUCATION.

The modern era which is full of technology and the information and the importance of education cannot be neglected Most of the countries in the entire world concentrating and focusing enthusiastically providing their best education to the nation since this is the only equipment that can differentiate the whole nation and the country to the other countries of the world How sorrowful matter is that our innocent children's still deprived to have such an important education that is needed everywhere.

Keeping in Eyes the aim in order to aware the nation the importance and the advantages of having good education the Education Wing Of SHEP (Society for Human Rights & Environment Protection) Regd Leaving no stone unturned working day and night making analysis, surveys conducting meetings seminars and motivating the illiterate peoples and giving them the final thought that they ought to take their steps

and make their children's future to their peaks of professionalism which is not only their future eventually our Pakistan's future as well and they have to brought the Pakistan to its peaks in any department of the life.

SHEP HEALTH DIVISION'S PROJECT.

(HAMID WAHEED KHAN MEDICAL CENTER)

A PROJECT OF SHEP

Today the poverty rate in Pakistan is more like 31% and except them lots of having wages lower to their basic needed requirements which are even not good enough to provide them the single time meal and the sky raising prices for the medicine is some time extremely hard to afford and sometimes these needy patients do not take the proper medication or treatment and most of the time serious ailments cause them severe problems and eventually the certain death get them deliverance to this cursing tension as they have to purchase some medicine to protect the life and get cure Just imagine the gravity of tention of these innocent peoples infact they know the essentiality of medicine and clearly they know the fact as if they do not have the prescribed medicine they will be losing everything out here and passing away but infront of the purchasing power they finally give up and prefer the death again

The **SHEP** paced their steps into providing the basic medical facility and the proper treatment in order to be the survivor source for the desired patients who cannot afford the medication. The center was formed in early 2003 after lots of surveys and the analysis and finally the location that was chosen based on entire low salaried and third class citizens. The **Hamid Waheed Khan Medical Centre** located at Drigh road main bazaar in **UC-1 Shah Faisal Town**.

Today approximately more than one hundred patients they get the consultation. medicines and medical related facilities free of cost or as low as PKR 10/= We are grown up and up with our medical center and our future forecasting are like a very large medical center at the same venue where we are now SHEP is more enthusiastic to take its aims where we have set our targets and would contribute like anything towards the prosperity and heights of our sympathizes to this nation.
